

Before Check List

Pool Closing

PRIOR to your closing please ensure the following:

- BALANCE YOUR WATER** up to one week before your closing. If you need this professionally done book a separate service call for **\$125 + chemicals prior to your closing.**
- VACUUM YOUR POOL:** Ensure your pool is free from debris. If you pre-book our crews are happy to provide a **standard** cleaning (up to 30 mins) for an additional **\$75** at time of closing. A heavy duty vacuum is an additional service call starting at \$150. If our crews show up and a heavy debris cleaning is required and not booked your pool will not be closed and a travel fee of \$45 will apply.
- PARTS:** Please leave all your pool parts (winter covers, water bags, winter plugs, etc) out for our team.
- DRAIN YOUR SUBMERSIBLE TUBES:** If you have a sump pit (located beside your skimmer) it must be drained prior to closing. Closing a pool with an undrained pit may cause your liner to shift. HOW to do this can be found [HERE](#).
- YARDS: Gates need to be unlocked, power and water available the day of closing.** Please ensure the yard is obstruction free and you have cleaned up after your pet. Pet waste is a health hazard for our team as hoses and equipment can be contaminated.

NEW ** Please be aware that if our team arrives for your scheduled pool closing and is unable to complete the service due to factors within the homeowner's control - such as lack of access, missing parts, pet waste, or no power - your appointment will be rescheduled. A \$45 travel fee will be applied for the additional trip.

SALTWATER POOLS – CITY OF TORONTO (City of Toronto Municipal Code Chapter 681) sets the allowable limits for swimming pool discharge containing salt into storm sewers as follows: SALT (sodium chloride) = NIL. Since rapid removal of salt water into storm drains is NOT allowed in the City of Toronto salt pool owners in TORONTO must lower the water just below the return jets prior to our arrival. You are permitted to discharge the water the following ways: - On the property/yard into the ground - Into your septic/sanitary system (laundry sink etc.)

If you are unable to lower the water ahead of time Pool Craft can schedule a service call to set up a utility pump. Please contact the office for pricing.

No Need to be Home! Every pool closing is unique and can take varying amounts of times to complete. Upon arrival we will quickly get to work in your yard without disrupting your day.
